

IN THE SPECIFICATION:

Please amend the specification as follows:

The paragraph starting at line 20 of page 11 and extending to line 5 of page 12:

On the other hand, if the file name of the new database is acquired, the new database is read out from the new database file 212 and the image processing is executed. Further, in the step S50, when the new database is formed by executing the calibration, the image processing is effected by using the formed new database (step S60). More specifically, by calling out a [[the]] color correction/color conversion module 209 and a [[the]] quantization/gradation correction module 210 under the file name of the acquired new database and by executing the image processing, the optimum printing result can be obtained by utilizing LUT corresponding to the mounted head.
